

**Luca Mainetti** is an associate professor of software engineering and computer graphics at the University of Salento. His research interests include web design methodologies, notations and tools, services oriented architectures and IoT applications, and collaborative computer graphics. He is a scientific coordinator of the GSA Lab - Graphics and Software Architectures Lab and IDA Lab - Identification Automation Lab at the Department of Innovation Engineering, University of Salento. He is the Rector's delegate at the ICT.

**Vincenzo Mighali** received the "Laurea" Degree in Computer Engineering with honors at the University of Salento, Lecce, Italy, in 2012. His thesis concerned the definition and validation of an energy-efficient and traffic-aware MAC schema based on directional antennas for Wireless Sensor Networks. Since January 2009 he collaborates with IDA Lab — Identification Automation Laboratory at the Department of Innovation Engineering,

University of Salento. His activity is focused on the definition and implementation of new tracking system based on RFID technology and on the design and validation of innovative communication protocol aimed to reduce power consumption in Wireless Sensor Networks. He is also involved in the study of new solutions for building automation. He authored several papers on international journals and conferences.

**Luigi Patrono** received his MS in Computer Engineering from University of Lecce, Lecce, Italy, in 1999 and PhD in Innovative Materials and Technologies for Satellite Networks from ISUFI-University of Lecce, Lecce, Italy, in 2003. He is an Assistant Professor of Network Design at the University of Salento, Lecce, Italy. His research interests include RFID, EPCglobal, Internet of Things, Wireless Sensor Networks, and design and performance

evaluation of protocols. He is Organizer Chair of the international Symposium on RFID Technologies and Internet of Things within the IEEE SoftCOM conference. He is author of about 70 scientific papers published on international journals and conferences and four chapters of books with international diffusion.

**Maria Laura Stefanizzi** graduated cum laude in Computer Engineering at University of Salento (Italy) in April 2012. Since January 2009 she collaborates with IDA Lab - Identification Automation Laboratory at the Department of Innovation Engineering, University of Salento. Her activity is focused on the design and validation through test beds on real devices of innovative applications and

protocols aimed to reduce power consumption in Wireless Sensor Networks. She is also involved in the study of new solutions for the integration of RFID and WSN technologies.

**Luciano Tarricone** is full professor at the University of Lecce (Italy). He has authored about 170 scientific papers and 5 books. His main contributions are in the area of the modelling of microscopic interactions of EM fields and biosystems, and in numerical methods for efficient CAD of MW circuits and antennas. He is currently involved in the finite-difference time-domain (FDTD) analysis of human-antenna interaction, graph-theory methods for the enhancement of numerical EM

techniques, novel CAD tools and procedures for MW circuits, EM parallel computing and metamaterials.
