Jelena Nakić is an Assistant Professor at Faculty of Science, University of Split, Croatia. She received M.S. degree in mathematics and computer science from Faculty of Science, University of Split, and M.Sc. and Ph.D. degrees in computer science from Faculty of Electrical Engineering and Computing, University of Zagreb. Her research interests are in the field of human-computer interaction and user-centered design with application to educational technologies such as e-learning systems, 3D virtual worlds and extended reality. She received an award of the Faculty of Science for the popularization of science and the faculty in 2017.

Dora Boban is a software engineer currently working for Atos Convergence Creators in Split, Croatia. She received M.S. degree in Computer Science and Technics, Specialisation in Education, at the University of Split, Faculty of Science, Croatia. She has been working for three years in the IT industry, in the field of software and web development and testing. Since 2022 she is Teaching Assistant at Faculty of Science on subjects related to Computer Architecture.
